Severe, ~~and~~ refractory migraine is a devastating ~~disease~~condition. Around 12% of the adult population suffers from migraine, which has been ranked among the top 20 causes of disability worldwide. ~~and around 12% of the adult population worldwide suffer from migraine. Although~~ According to recent surveys, ~~,~~ migraine ~~represents~~ is an important cause of temporary disability~~, as shown by recent surveys.~~. However, only ~~about~~ approximately 50% of people with migraine, even ~~them~~ those with disabling headaches, ~~have never~~ consult~~ed~~ a physician ~~for the problem~~for the condition. Chronic migraine is defined as the occurrence of migraine ~~headache occur~~on~~ring~~ more than 15 days per month for more than ~~three~~3 months (in the absence of medication overuse and not attributed to another disorder) ~~is defined as chronic migrainous daily headache.~~ ~~Such migraine~~. It ~~is usually resistant and poorly~~ responds poorly to classic~~al~~ abortive and preventive medical therapies, and a multidisciplinary approach is used to manage it. ~~Since ancient time,~~ Traditional herbal medicines (~~e.g.~~such as lavender, acupuncture, chiropractic, and acupressure) have been used as abortive and preventive therapies~~y~~ for severe migraine since ancient times. Non-pharmacological interventions, ~~(e.g.~~such as relaxation therapy~~)~~, ~~is~~ have been recommended for the management of migraine ~~and a multidisciplinary approach is used for the management of migrainous chronic daily headache. Few~~ . Unconventional treatments for ~~the prevention of~~preventing migraine ~~are, namely,~~ include ~~applying~~ pressure application to the head during ~~headache~~migraine, ~~applying~~ ice pack application, manipulation of the neck, acupuncture, hypnosis, and herbal therapy. The aim of the present study ~~research~~ was ~~designed~~ to investigate the safety and efficacy of local subcutaneous steroid injections as an abortive and preventive ~~treatment~~ therapy ~~of~~ for managing chronic ~~migrainous daily headache~~migraine ~~by local subcutaneous steroid injection~~. ~~Based on our~~ Our survey of neurological literature ~~survey,~~ suggests that this is the first reported study in this field.

Comment [A1]: Commas are used to separate adjectives that separately modify the noun. These types of adjectives are called coordinate adjectives.

Comment [A2]: Terms such as *however*, *additionally*, *furthermore*, *moreover*, and *therefore* are used as transition words to help in a better flow of ideas.

Comment [A3]: In academic writing, information should be presented with accuracy and conciseness. Using the right term to convey information helps in better comprehension. In the given context, "chronic migrainous daily headache" has been replaced with a more accurate and standard term, "chronic migraine."

Comment [A4]: Maintaining consistency in the usage of terminology in an academic document aids in comprehension and readability. In this context, "headache" has been replaced with "migraine" throughout the document for consistency.
